PROFESSIONAL SUMMARY

Full-stack engineer with 6+ years of experience designing, building, and scaling production web applications. Proven track record leading engineering teams, architecting platforms serving thousands of users, and driving measurable performance gains. Deep expertise in React/Next.js ecosystems, Python/Django backends, and modern CI/CD practices.

PROFESSIONAL WORK EXPERIENCE

Massenergize, Wayland, USA

May 2019 - Present

Full Stack Engineer, Remote Contractor | React(SPA), Redux, Django, AWS

- Lead engineer on a community climate-action platform serving thousands of users; own end-to-end delivery from database schema to UI.
- Architect PostgreSQL data models and optimize queries, reducing p95 API latency and supporting 3× user-base growth without infra changes.
- Build a Storybook-driven component library of 40+ reusable primitives, cutting new-feature dev time by ~35%.
- Establish CI/CD pipelines (GitHub Actions) with E2E (Cypress) and unit (Jest) test suites achieving 85%+ critical-path coverage.
- Partner with designers (Figma/Adobe XD) and product stakeholders to ship polished, accessible interfaces on tight timelines.

Pidaso, Accra, Ghana

Jan 2024 - Sept 2025

Frontend Engineer, Remote Contractor | NextJS, Tailwind, Zustand

- Delivered pixel-perfect web apps from complex Figma specs; Lighthouse 93+, FCP 0.7s, LCP 0.9s.
- Designed a scalable design-token and theming system across three product lines, reducing styling overhead by 40%.
- Integrated Next.js SSR/ISR and TanStack Query for caching and optimistic updates, delivering 30% faster perceived load times.

Testewb, Accra, Ghana

Feb 2025 - Nov 2025

Full Stack Engineer, Remote Contractor | NextJS, NestJS, Tailwind, Zustand

- Designed and led the development of a QA platform for bug-bash sessions, streamlining issue tracking for distributed teams.
- Built NestJS backend with JWT auth, RBAC, and RESTful APIs; integrate GitHub API for auto-converting bug reports into issues.
- Deployed on Render with automated CI/CD, achieving zero-downtime releases on every merge to main.
